RESURFACING SERVICES

Concrete Overlays • Epoxy Flooring • Polished Concrete

JH3COMPANY.COM

JH3 Company provides a wide variety of decorative concrete resurfacing services utilizing the most advanced preparation techniques, texture styling and surface coatings. Our team of concrete resurfacing specialists have decades of experience resurfacing concrete in both the commercial and residential setting.

CONCRETE OVERLAYS

Why remove and replace old, cracked and discolored concrete when you can simply resurface it? We can personalize your overlay projects with original designs that enhance your indoor and outdoor décor.

Whether you choose to overlay with an engraving or acid stain, we can transform your traditional gray concrete into a work of art through dyes, textures and patterns.

Concrete resurfacing overlays provide beautiful, long lasting and easy to maintain finishes for virtually any existing concrete floor surface.

EPOXY FLOORING

If you need a durable, scratch resistant floor to withstand heavy traffic, an epoxy floor coating is one of the best floor covering solutions to choose from.

We provide all types of epoxy floor solutions for high-traffic, high-impact indoor or outdoor surfaces such as garage floors, kitchens, bathrooms, offices and warehouse floors.

We will help you choose the best epoxy floor style to match your need for beauty, safety and strength. To achieve the desired result, we will mix the epoxy coating with different types of substances, such as decorative chips of mica, granite or quartz, quartz sand, terrazzo and gravel.

POLISHED CONCRETE

The highly skilled practice of polishing concrete as a floor finish is best left to our experts who have decades of experience perfecting polished concrete to an art form. The unique results we can achieve are simply limitless!

Eco-sensitive homeowners, business owners and designers favor polished concrete because its an environmentally efficient and sustainable flooring material. Due to its long life cycle, thermal mass properties, low maintenance requirements and reflective surface, polished concrete can help reduce electrical costs.
